INTERNSHIP ASSIGNMENT PROJECT

1. Create a student application table having first name, middle name, surname, full name, Gender, Date of Birth, Age and any other necessary field. The key field should be automatically populated using No. Series. Full Name should be populated from first name, middle name and surname. Add Age field to be calculated from the date of birth.
2. Add minimum age and maximum age field in the Student management setup table and ensure age requirement is met during application.
3. Create approval workflow for the student application. When document is approved, create the student as a customer. Add a student grouping in the customer table and create relevant list and card pages with the filter.
4. Create a role center and add any page created in this task there.
5. Add Course, Academic Year, Semester, Units setup table. Add necessary pages and add to the role center.
6. A course can take a duration of 3 to 5 years to complete. Each year has 2 semesters. A student registers for each semester and is allocated the semester units.
7. A student is billed different charges including tuition, library, activity at the beginning of each semester. A student pays for the billed amount and is issued a receipt.
8. A student sits for exams for each unit at the end of the semester. If a student fails in a unit, a supplementary exam is administered.
